

## VALPAINT E-VOLUTION EASY

### SPECIFICATIONS

Supply and installation of VALPAINT E-VOLUTION EASY, a quick-drying decorative system specifically designed for the coating of vertical and horizontal surfaces, even in humid environments, including surfaces in contact with water (bathrooms, showers, etc.).

The two-component resin that completes the cycle creates continuous, walkable, and water-resistant surfaces.

The product can be applied with a spatula to different surfaces, including existing tiles, cementitious surfaces, and plasterboard, following the appropriate procedures as specified in the technical data sheets.

The application technique provides for a series of steps, including: surface assessment, application of various layers according to a procedure defined by the manufacturer, and cleaning.

Various aesthetic effects are possible:

- VALPAINT E-VOLUTION EASY MARBLE EFFECT **only on vertical surfaces**
- VALPAINT E-VOLUTION EASY SMOOTH EFFECT

The entire cycle must be carried out in accordance with the application standards, including the material, the application, and the temporary works necessary for the process.
